

Oscar Weimann

oslewei | oslewei@proton.me | oscar-weimann | The Hague, The Netherlands

Computer Scientist focused on AI, cybersecurity, and low-level systems, with an interdisciplinary research background

Education

Bachelor of Computing Science

Rijksuniversiteit Groningen

Sep 2023 - Jul 2026

Groningen

- Thesis: SparseBDL: Blockchain-Enabled Byzantine-Robust Decentralized Learning over Sparse Topologies
- Courses: Software Engineering | Blockchain Technology | Applied Cryptography
- Grade: 8.6/10 | 215/180 ECTS

Honours Programme

Honours College Groningen

2024 - 2026

Groningen

- Alumni of the RUG Honours College, focusing on *interdisciplinary* and *professional life skills*
- Attended a Summer School at the Universitat Autònoma de Barcelona, on Religion in the Public Domain

Exchange Programme

Nanyang Technological University

Sem 1 2025 - 2026

Singapore

- Courses: Applied Cryptography | Blockchain Technology | Cyber Threat Intelligence | Embedded Programming | Biomedical Imaging

Professional Experience

Software Engineering Internship

Researchable

Sem 2 2024-2025

Groningen

- Built an extensible automatic vulnerability parsing and storage framework in Go as part of a 4 person team
- It ingests vulnerability scanner output via user-defined parsers through CI/CD, storing and visualizing results on Grafana
- Enabled Researchable to keep track of vulnerabilities on Grafana to conform to their ISO-27001 certification

Automatic CTF-Challenge Validator

Honours College Groningen

Sem 2 2025-2026

Groningen

- Streamlined the *Ethical Hacking* Master's-level course final assessment, consisting of building a CTF challenge
- Built an automatic *Capture The Flag* challenge validator, that checks if a wide variety of challenges is solvable

Hack050

Gemeente Groningen

Sem 1 2024-2025

Groningen

- Attended a *hacking competition* organized by the Gemeente Groningen to find vulnerabilities in their infrastructure
- Learned real-world cybersecurity and *penetration testing* environments, working in a team to attack the system

Research

The crossroads between AI, AI generated religions and freedom of religion

Honours College Groningen

Sem 1 2026 - Present

- Worked in a group of varied academic backgrounds to describe the effect of the AI boom on freedom of religion
- Described LLMs technically, using Moltbook and OpenClaw as a case study, focusing on *interdisciplinary* research
- Currently working towards official publishing in an academic journal

Personal Projects

ML Framework in C

2025 - Present

- Built a *machine learning library* in C without mandatory external dependencies, achieving 98% accuracy on MNIST

Path Tracer in Zig

2025 - Present

- Built a *multithreaded pathtracer* in Zig, following the *Raytracing in one Weekend* book series
- Achieving high-definition CPU renderings of the *Cornell Box*

Skills

Languages	English (Native) German (Native) Spanish (Native) Dutch (Fluent) French (Conversational)
Programming	C/C++ Python Go Zig Rust HTML/CSS/JS Gleam
Tech Stack	Git CI/CD Docker Linux Grafana
Personal Interests	Rugby Cooking Reading Recreational Programming Travelling
